## 2012 SUMMER STUDY: ECOLOGICAL CONSERVATION

Available exclusively through Adelante, this 4 week program is a unique opportunity for ecology or environmental science students or anyone interested in conservation.

Based in the rolling hills just outside Edinburgh, this summer program takes place at Oatridge College, Scotland's largest land-based college, a national leader in helping to sustain the rural economy of Scotland.

### 4-Week Summer Program:

**May 27–Jun 22**

Take courses in Habitat Management and Conservation Skills while exploring first-hand the country's diverse habitats.

In addition to classroom instruction, students will be involved in practical and hands-on experiences exploring a range of habitats and wildlife both on the extensive college campus and through field trips to other areas of Scotland.

Also included is an educational program of visits to several of the main cultural and natural heritage sites of Scotland and the internationally recognized Royal Highland Show.

*"The scenery is beautiful here! There are mountains, the Firth of Forth nearby, and old Edinburgh has all really old buildings that all resemble castle like structures! To anyone wanting to study abroad, I say go for it. You will learn so much and it isn't as frightening as some might think. If you have a good program like Adelante that sets everything up for you, you will be fine and enjoy yourself to the fullest."*

**Mary D, University of Arkansas. Scotland 2011**

*"I have been in Edinburgh for 22 days, and I have loved it each day! It took me quite a while to get here, but now that I am here, I can confidently say that I never want to leave. Site-seeing in Scotland has taken me to a whole other level, never have I fallen so in love with a city before. Edinburgh is friendly, beautiful, and feels very much like a home. Excited to travel up to the Highlands and experience Loch Ness, the Isle of Skye, and the Eilean Donan Castle soon."*

**Mary M, Iowa State University. Scotland 2011**
